NOV1841	ESC - Novak Rooster Crawler	1 or 2*

You will also require a battery such as a 6 cell 7.2v stick pack. We choose to run 2 cell lithium batteries from 2000mAh up to 3700mAh.

You will also need the appropriate battery charger.

* If you run two ESCs then you can power the front and rear wheels independantly of each other. This is VERY useful. You will however need a 4 channel radio such as the DX6 to do this.
